2027 GRADUATE HIRING | GROWTH ENGINEER ROLE

OPTION 1: MULTI-CHANNEL LEAD GENERATION AND OUTREACH ENGINE

Seven-day individual assessment | Option 1 of 4 | Lead generation and outreach beyond email

Goal: Build a launch-ready system that finds creators who need IncuBrix, verifies them, picks the best channel for each, and writes personalised outreach on at least 3 channels, so IncuBrix can start on day one and rerun it weekly. 1,000 verified leads is the minimum; 5,000 is exceptional.

1. What you must deliver

Part	Required outcome
Product and market insight	Use the product. Submit 5 observations and the 3 biggest opportunities to win creators, each with evidence.
Verified leads	At least 1,000 unique, qualified creators in leads.csv, each with the best channel to reach them, a backup channel and the verified public handle or URL. Mark the best 25 as Priority A.
Outreach kit	Sequences for each segment on at least 3 channels: email plus 2 others (for example LinkedIn, Instagram, X, YouTube, a community, a podcast-guest pitch or a partner referral). A personalised first message and 2 follow-ups for every Priority A lead.
Automated engine	Code or a workflow that finds, checks, removes duplicates, scores, picks the channel, drafts messages, exports a CRM-ready file and refreshes.
Seed test	Run your sequences on test accounts you own on 3 channels to prove scheduling, tracking links and reply logging work.
Launch kit	30-day plan: safe daily volume per channel, tools, owner actions, and expected reply and meeting rates with reasoning.

2. Who to target

- Creators only: podcasters/video podcasters, YouTubers/video-first creators and expert-led creators (coaches, consultants, educators who publish content). Do not include agencies, management firms, generic brands, publications, directories or fan accounts.
- Developed, English-speaking markets: at least 80% from the United States, Canada, United Kingdom, Ireland, Australia, New Zealand or Singapore. Use at least 3 countries; no country may exceed 60%.
- Recent content must be mainly in English. Use only public, consented or properly licensed business information.

3. When a lead counts as qualified

A lead counts only when every check below is complete and backed by a working public source link.

Check	Simple requirement
Real and relevant	A real creator in an approved segment and country, with an official profile and stable platform ID.
Active	Either 8 content items in the last 30 days or 2 long-form items in the last 60 days.
Commercial	Public evidence of a sponsorship, product, service, course, membership, subscription, affiliate offer or similar.
Needs IncuBrix	Evidence of a need in content creation, repurposing, editing, captions, publishing, consistency, backlog or team workflow.
Reachable	The chosen channel is real, public, used by the creator for business contact and active in the last 60 days. No guessed emails or handles.
Personalised and compliant	Messages mention a specific recent piece of their content, show who is sending, include an opt-out and follow platform rules (no bulk automated messages where forbidden).
Complete and unique	All required workbook fields are complete, evidence was checked in the last 30 days, and the creator appears only once.

Minimum result: 1,000 unique qualified creators; 85%+ of our 20-lead random audit qualifies; 90%+ of sampled channels and contacts are correct; 0% duplicates; 3 channels ready; seed test passed; engine reruns.

SUBMISSION AND EVALUATION

4. Submit these five items

Item	What to submit
1. Submission Workbook	Complete the Excel workbook for your option. Yellow cells are your inputs; green cells calculate. Fill in the Self-check tab with a link to evidence for every claim.
2. Main output	leads.csv (UTF-8, same columns as the workbook) and an outreach folder with all sequences and messages. leads.csv is the full, official lead list.
3. Engine	Private repository or shared folder with your code or workflow, configuration, tests and a README with one clear run command. Do not include passwords or secret keys.
4. Launch kit	One document IncuBrix can act on next Monday: step-by-step plan, owners, tools, budget, targets and risks. Nothing should need rework.
5. Two short videos	Unedited. (a) Product walkthrough, up to 5 minutes. (b) Technical demo, up to 8 minutes: one normal run, a refresh on new input, and recovery from one simple failure.

5. How IncuBrix evaluates

Area	Points	What full marks look like
Product and market insight	10	Specific observations backed by evidence, and growth opportunities IncuBrix can act on.
Lead and outreach quality	35	Leads truly fit IncuBrix (15), channels and contacts are correct (10), and messages are specific and persuasive (10).
Automation and scale	20	Another person can run your engine from the README. It refreshes, avoids duplicates, logs errors and shows runtime and cost at scale.
Launch readiness	10	IncuBrix could start next Monday from your launch kit with no rework: clear steps, owners, budget and targets.
Live review	25	You trace random items back to evidence, run your engine on a new input we give you, and explain your decisions honestly.

Final result: below 65 = not selected | 65-74 = hold | 75-84 = strong hire | 85+ = exceptional hire, only when all exceptional requirements also pass.

6. How we check your work

- IncuBrix recalculates every number from your files. Totals typed into the workbook are not official.
- We pick 20 leads at random from your main output (you cannot choose or replace them) and check each one against the quality bar.
- We run your engine ourselves, using only your README.
- Live review (45 minutes): you trace 5 random leads back to their evidence, run your engine on a small new input we give you, and explain one decision you would change.
- A growth reviewer and an engineering reviewer score separately. Any change to a score must point to evidence.

7. Exceptional result

- At least 5,000 unique creators, with at least 90% of our audit sample qualifying and at least 95% channel accuracy.
- At least 250 Priority A leads, each with a complete personalised sequence.
- The engine refreshes 5,000 rows with 0% duplicates, with runtime and cost documented.
- A channel-mix recommendation backed by evidence of where these creators actually respond.

8. Tools and integrity rules

- Use any AI tool, data source or service, free or paid. List them all in the workbook. No paid tool is required, and IncuBrix does not refund costs unless agreed in writing first.
- Work on your own. Disclose any manual work and where AI helped.
- Do not contact real creators. Send outreach only to test accounts you own. Do not present yourself as an IncuBrix employee.
- No fake, bought or guessed data, contacts, followers, engagement or results. Do not scrape against a site's terms, bypass logins or use private or leaked data.
- Follow privacy and marketing laws (for example India's DPDP Act, GDPR and CAN-SPAM) and every platform's rules.

- Made-up evidence, or being unable to explain and rerun your own work, disqualifies the submission.
- If a product feature or source is unavailable, record it with the date, time and evidence. You are not expected to work around restrictions.

Final check: Before submitting, confirm: 5 observations, 3 opportunities, at least 1,000 qualified creators, 25 Priority A leads with full sequences, 3 channels, no duplicates, seed test proof, a repeatable engine, launch kit, completed workbook, leads.csv, README, repository access and both video links.
